Proovit

Your Progress, Proven

Kiran Silwal | Rupak Raut | Nishit Thapa | Maddox Elarton

The problem

Why people quit their routines?

- No visibility in progress
- Inconsistent photographic records
- Different app for different purposes is too much hassle

What Proovit does:

- Integrates authentic photo capture, structured habit formation, and visual progress review into a single purpose-built tool across fitness, skincare, hair care, and general wellness

Who is it for?

- Anyone who wants to track their progress, regardless of the scale
  - University student
  - Teenager just getting into gym
  - Influencer who makes skincare videos for a living
  - Middle-aged man getting his hair back with Rogaine
- They all need:
  - Visible evidence of progress
  - The experience to feel smooth and frictionless

Competitors

- Progress photo apps (Progress, TimeCamera): Basic comparison, no authenticity enforcement; users disengage after week one

- Fitness trackers (MyFitnessPal, Strava): Have strong data tracking but lack visual components; lack of photo features

- BeReal: Has authentic real-time capture but no self-improvement structure; lack of personal values

- DIY solutions (Notion, photo albums): flexible but no structure; often abandoned quickly

- Apps like Streaks, Habitnow, Way of Life, and Habitify can be helpful in habit building but are mostly binary (track completion instead of outcome) and have too much friction in UI

What makes Proovit different

- Habit trackers focus on accountability without documentation.
- Progress photo apps focus on documentation without accountability.
- We integrate both into a single product.

- Camera-only capture: No gallery uploads; Photos are real & time-stamped.
- Category tagging: Consistent angles and context for categorical comparisons.
- Multi-domain consolidation: Fitness, skincare, hair, and custom goals in one app.
- Progress Reel: Auto-generated timelapse, shareable, organic growth mechanism.
- Reward documentation: Supports retention with lower barrier.

Camera-Only Photo Logging

Opens your camera directly — you can't upload from your gallery

Each photo is timestamped and tagged to a category you set

Streaks & Daily Reminders

A visible streak counter displayed on the home screen

Local notifications at a time the user chooses

Once you're on day 30, you really don't want to break it

Calendar View

Month-at-a-glance view showing logged vs. missed days

Tap any day to see photos from that date

Gives users a clear picture of their consistency over time

Side-by-Side Comparison

Pick any two dates and view photos next to each other

Filtered by category so comparisons are accurate

Gradual change becomes obvious when you put Day 1 next to Day 90

Progress Reel

Auto-generated timelapse from all photos in a category

Date overlays on each frame so users can see the timeline

Shareable — this is how the app spreads naturally

User Testing

- Closed-Beta testing within the University of Southern Mississippi
- Utilize Personal networks and programs like The Hatchery
- Two-Week testing period
- User Journeys
- Gain Valuable feedback from users through

User Journeys (In-person Observation)

Testing Journeys

- Create an account
- Create a tracker
- Capture picture
- Compare entries

Expected Outcomes

- Features easily accessible by users
- Tasks are completed and tracked
- Streaks created to show progress
- Simple navigation for users

User Insight and Feedback

Pros

- Users found the sign-up process simple and straightforward
- Users found the photo comparison feature intuitive and exciting
- Streak feature is keeping users motivated and engaged

Cons

- One user found the photo upload process confusing
- Multiple users reported being lost in app navigation(specifically the progress reel feature)

Iteration Plan

Improvements based on feedback

- Simplified and guided photo upload process
- Make features more visible and accessible for user friendly navigation

Future steps

- Implement fixes and improvements to user concerns
- Initiate new testing cycle
- Test previous users along and expand reach to new users

Thank you!
